

TECHNICAL SKILLS

FRONTEND

React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion, UI/UX

BACKEND & DATABASE

Node.js, Express.js, MongoDB Atlas, Supabase, RESTful APIs

LANGUAGES

JavaScript (ES6+), C, C++

TOOLS & DEPLOYMENT

Git, GitHub, Vercel, Netlify, Render, Postman, Razorpay, Chrome DevTools

EDUCATION

B.Tech — Computer Science & Engineering

Coding Gita (Offline Institute)
2nd Sem · 2025 – Present

CERTIFICATIONS & AWARDS

Meta — Front-End Development
Coursera
Grade: 99%

Hacksagon 2026 Ideation Phase
ABV-IIITM IEEE
2026

Elite Hack 1.0 Participation
Elite Coders
2026

Dhirubhai Ambani Hackathon
DA-IICT
2026

CORE STRENGTHS

- Rapid Prototyping & Shipping
- Full-Stack Architecture
- Clean Component Design
- API & Webhook Integration
- Performance & SEO Optimization

PROFESSIONAL SUMMARY

B.Tech Computer Science student with hands-on experience architecting, building, and deploying production-ready full-stack web applications. Proficient in React, Node.js, Express, and MongoDB, with a proven track record of shipping **4+ live SaaS-style platforms** in the first year of studies. Passionate about performant system design, clean UI/UX, and solving real-world engineering challenges.

FEATURED TECHNICAL PROJECTS

Stockply — Digital Supply Chain SaaS Platform [Live Demo](#) [Source Code](#)

React.js · Node.js · Express · MongoDB · Tailwind CSS

- Architected a high-fidelity, full-stack B2B SaaS ecosystem connecting retail shop owners with suppliers for synchronized inventory management and procurement.
- Engineered real-time inventory tracking with automated low-stock threshold alerts and one-click purchase order dispatch to streamline supply replenishment.
- Implemented responsive data-driven analytics dashboards with optimized MongoDB aggregations and sub-second latency state synchronization.

Vestiga — Freemium SaaS with Subscription Billing [Live Demo](#) [Source Code](#)

React.js · Node.js · Supabase Auth · Razorpay Payments · Express

- Built an end-to-end SaaS platform featuring secure authentication via Supabase and a synchronized local database schema for high reliability.
- Integrated tamper-proof Razorpay payment gateway workflows with secure HMAC webhook signature verification and automated tier provisioning.
- Configured strict CORS policies, resilient error boundaries, and environment-segregated deployment on Vercel and Render.

AI-Adaptive Onboarding Engine — Career Upskilling Platform [Live Demo](#) [Source Code](#)

React.js · Node.js · Express · MongoDB · OpenAI API · Tailwind

- Engineered an intelligent career accelerator that parses resumes against target job specs to identify granular technical skill gaps.
- Dynamically generates interactive, dependency-aware learning roadmaps with progressive disclosure UI, instant demo mode, and PDF exports.
- Implemented JWT-secured API routes, isolated state machines, and real-time visualization analytics for seamless onboarding workflows.

KEY ACHIEVEMENTS & IMPACT

- Rapid Product Delivery:** Conceptualized, engineered, and deployed 4+ full-cycle frontend and backend platforms within first two semesters of college.
- Algorithmic Problem Solving:** Actively solving competitive programming problems on LeetCode in C++ & JavaScript, mastering fundamental DSA concepts.
- Open-Source & Developer Community:** Actively publishes code on GitHub and shares end-to-end project walkthroughs on YouTube for peer learning.
