SKILLS

Frontend Development:

- React / Next.js, HTML5, CSS3, Tailwind CSS, UI/UX Design

Backend Development:

- Node.js, Express.js, RESTful API Development

Programming Languages:

- JavaScript, C, C++

Database & Data Management:

- MongoDB, Redis

Tools & Deployment:

- Git / GitHub, Chrome DevTools, Vercel, Netlify, Render

Computer Science Fundamentals:

- Performance Optimization, Responsive Design, System Fundamentals

EDUCATION

Coding Gita (Offline Institute)

- Bachelor of Technology in Computer Science & Engineering (B.Tech CSE)
- Currently in 2nd Semester

CERTIFICATIONS

Core Programming & Development

- Meta - Introduction to Front-End Development:** Coursera Verified (Grade: 99%). Focus: Modern HTML/CSS, UI principles, and development workflows.
- Meta - Introduction to Back-End Development:** (In Progress) Targeted learning in server-side logic, databases, and architectural patterns.
- Google - Maximize Productivity With AI Tools:** (Upcoming) Exploring advanced developer workflows using Generative AI.

PROJECTS

API Image Gallery – Dynamic Visual Explorer

(HTML5, CSS3, JavaScript, Pexels API)

- Engineered a high-performance, mobile-first gallery application utilizing the Pexels API for real-time visual search and rendering.
- Implemented lazy loading and optimized asset delivery to achieve near-instant load times.
- Designed a pixel-perfect responsive layout from scratch without relying on external CSS frameworks.

[Live Demo](#) [Source Code](#)

Movie Explorer – Cinematic Database Browser

(React.js, Tailwind CSS, OMDb API)

- Architected a scalable React.js frontend with dynamic OMDb API integration and efficient state management for deep-dive cinematic searches.
- Built a premium UI/UX experience incorporating Tailwind CSS animations and modular component structures.
- Optimized search result handling and detail page rendering for a seamless, fast-paced user experience.

[Live Demo](#) [Source Code](#)

Weather API Wrapper – Backend Architecture

(Node.js, Redis/MongoDB, Render)

- Designed a sophisticated Node.js backend wrapper to optimize public weather API requests and reduce latency.
- Engineered a robust caching layer utilizing Redis and MongoDB to minimize external API calls and improve system resilience.
- Implemented a scalable RESTful API structure focused strictly on high-performance backend architecture.

[Source Code](#)

Brand Clone Ecosystem – Design Engineering

(HTML5, CSS3, JavaScript)

- Developed pixel-perfect frontend recreations of industry-leading websites (DJI, Nothing, Prime).
- Mastered complex CSS Grid/Flexbox layouts and modern typography standards to match professional-grade designs.
- Replicated advanced responsiveness and precise micro-interactions for an enhanced, dynamic user experience.

ACHIEVEMENTS

- Rapid Feature Shaper:** Successfully conceptualized and deployed 4+ full-cycle frontend and backend projects within the first two semesters of engineering.
- Active Technical Contributor:** Consistently solving algorithmic challenges on LeetCode and sharing coding project progress via the "Priyank Creates" YouTube channel and public repositories.
- Tech Tinkerer:** Demonstrated deep-seated knowledge in system optimization beyond the web through Android rooting and custom ROM deployment.
